

2012: Resetting the Count Maya Opinions on 2012

Otoniel R. Sacal

According to our grandparents, 2012 is the end of an era, the end of a 5,125-year cycle, and after this end, we then enter another 5,125-year cycle. According to the Maya way of counting, it is the fourth era. Three eras have already passed and this is the fourth one. In the same way that three eras have passed, and the fourth one is going to end, there could be 5, 10, 15, or 20 more eras. The problem is that other people have appropriated our grandparent's knowledge, the ancient knowledge, and claim that the world is going to end during this time.

I would like to make a call on to be more humble, and have more solidarity. Men and women in solidarity are the ones who are doing something for the benefit of our communities.
